MONKEY ROCK GROUP, INC.
Notes to the Financial Statements
June 30, 2023, and 2022

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

MONKEY ROCK GROUP, INC. (the "Company") a Wyoming Corporation in the United State, was formerly a software development company that develops Artificial Intelligence (AI)-based products. As of the date of this filing, the Company is entering into new business agreements in new business engagements.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include the estimated useful lives of property and equipment. Actual results could differ from those estimates.

Concentrations of Credit Risk

Financial instruments that potentially expose the Company to concentration of credit risk consist primarily of cash and accounts receivable. The Company's cash is deposited with major financial institutions. At times, such deposits may be in excess of the Federal Deposit Insurance Corporation insurable amount.

Cash and Cash Equivalents

The Company considers all cash accounts, which are not subject to withdrawal restrictions or penalties, and all highly liquid debt instruments purchased with a maturity of three months or less as cash and cash equivalents. The carrying amount of financial instruments included in cash and cash equivalents approximates fair value because of the short maturities for the instruments held. There were \$0 cash equivalents for the years ended December 31, 2022.

Fair Value of Financial Instruments

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic No. 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels, as described below:

Level 1: Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable, either directly or indirectly. Level 2 inputs include quoted prices for similar assets, quoted prices in markets that are not considered to be active, and observable inputs other than quoted prices such as interest rates.

Level 3: Level 3 inputs are unobservable inputs.

The following required disclosure of the estimated fair value of financial instruments has been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The methods and assumptions used to estimate the fair values of each class of financial instruments are as follows: Accounts Receivable, and Accounts Payable. The items are generally short-term in nature, and accordingly, the carrying amounts reported on the consolidated balance sheets are reasonable approximations of their fair values.

The carrying amounts of Notes Payable approximate the fair value as the notes bear interest rates that are consistent with current market rates.

Income Taxes

We follow ASC 740-10-30, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Statements of Income in the period that includes the enactment date.

We adopted ASC 740-10-25 (“ASC 740-10-25”) with regard to uncertainty income taxes. ASC 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under ASC 740-10-25, we may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. ASC 740-10-25 also provides guidance on derecognition, classification, interest and penalties on income taxes, and accounting in interim periods and requires increased disclosures. We had no material adjustments to our liabilities for unrecognized income tax benefits according to the provisions of ASC 740-10-25.

Net income (loss) per common share

Net income (loss) per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period. The weighted average number of common shares outstanding and potentially outstanding common shares assumes that the Company incorporated as of the beginning of the first period presented. For the years ended December 31, 2022, and 2021, the diluted loss per share is the same as the basic loss per shares as the inclusion of any potentially dilutive shares would result in anti - dilution due to the net loss incurred by the Company

Recent Accounting Pronouncements

The Company has implemented all applicable accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

NOTE 3 - GOING CONCERN

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has no revenue and has an accumulated deficit of (6,340,015) as of December 31, 2022. The Company requires capital for its contemplated operational activities. The Company’s ability to raise additional capital through the future issuances of common stock is unknown. The obtainment of additional financing, the successful development of the Company’s contemplated plan of operations, and its transition, ultimately, to the attainment of profitable operations are necessary for the Company to continue operations. These conditions and the ability to successfully resolve these factors raise substantial doubt about the Company’s ability to continue as a going concern. The financial statements of the Company do not include any adjustments that may result from the outcome of these uncertainties.

NOTE 4 – INCOME TAXES

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss, and tax credit carryforwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. The U.S. federal income tax rate of 21% is being used.

Net deferred tax assets consist of the following components as of:

	December 31, 2022	December 31, 2021
Federal income tax benefit attributable to:		
Current Operations	\$ 3,045	\$ 1,050
Less: valuation allowance	(3,045)	(1,050)
Net provision for Federal income taxes	\$ —	\$ —

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income from continuing operations for the fiscal years ending, due to the following:

	December 31, 2022	December 31, 2021
Deferred tax asset attributable to:		
Net operating loss carryover	\$ (6,340,015)	\$ (6,330,515)
Less: valuation allowance	3,045	1,050
Net deferred tax asset	\$ 6,336,970	\$ 6,329,465

At December 31, 2022, the Company had accumulated deficits of approximately \$(6,340,015) that may be offset against future taxable income from the year 2022 to 2040. No tax benefit has been reported in the December 31, 2022, financial statements since the potential tax benefit is offset by a valuation allowance of the same amount.

Due to the change in ownership provisions of the Tax Reform Act of 1986, net operating loss carry forwards for Federal Income tax reporting purposes are subject to annual limitations. Should a change in ownership occur, net operating loss carry forwards may be limited as to use in future years. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years before 2015.

NOTE 5 – SUBSEQUENT EVENTS

In accordance with SFAS 165 (ASC 855-10) management has performed an evaluation of subsequent events through the date that the financial statements were issued and has identified the following events to disclose in these financial statements.
